

Revision History

Date	Version	Revision
11/21/2017	1.2.2.2R10	<ol style="list-style-type: none">Optimized the self-calibration for better offset accuracy. Note: Self-calibration must be executed after upgrading to this version. Please be sure the scope has been working continuously for at least 30 minutes before performing the self-calibration.Fixed several bugs<ol style="list-style-type: none">Intermittent inaccuracies in measurements collected during Roll mode.Max hold would not clear correctly in FFT
4/06/2017	1.2.2.2	<ol style="list-style-type: none">Released the Power Analysis optionCompatible with SPL1016 and SPL1008 logic probes (SDS2000 only)Fixed several bugs in serial decode
11/18/2016	1.2.2.1R9	<ol style="list-style-type: none">Optimized the FFT<ol style="list-style-type: none">The maximum number of FFT points was increased from 1.4k to 16kFlattop window was addedThe UI was optimizedOptimized the hardware frequency counter. Improved low frequency resolutionOptimized the Autoset functionOptimized the LAN port efficiencyFixed several bugs<ol style="list-style-type: none">Fixed abnormal display of digital channels in some casesZooming display caused I2C decode errorsAC/HFR trigger problemRepaired UART decode problem from previous versions (1.2.2.x)
6/27/2016	1.2.1.38.7	<ol style="list-style-type: none">Added support for measurements in Roll mode at run stateAdded slew rate+ and slew rate- measurement parameters and updated the description of some parametersDisabled insignificant measurements on FFTFixed several bugs<ol style="list-style-type: none">Incorrect timing in finite persistence modeValues would change on trigger delay, level,

Date	Version	Revision
		<ul style="list-style-type: none"> offset etc. when adjusting horizontal, offset and level position back and forward c) Unmatched side lobe suppression with Blackman or Hamming windows in FFT mode d) Skew between analog and digital channels out of spec e) Freeze problem in some specified cases f) Measurement statistics did not update in some cases g) Incorrect measurement on ROV、FOV、RPRE、FPRE
4/11/2016	1.2.1.33.1	<ol style="list-style-type: none"> 1. Improved the user experience on the universal knob 2. Added virtual numeric keypad function to facilitate input of large numbers (depress universal knob to activate this feature) 3. Optimized the persistence display in pass/fail mode 4. Added ASCII decoding 5. Fixed several bugs <ul style="list-style-type: none"> a) Pushing the trigger level knob in AC coupled trigger mode does not bring the level back to zero b) Setting baud rate was too sensitive in trigger setup c) Arrow in decoding list displays abnormally d) Digital channel display problem e) All frames are not mapped to the display in sequence mode with frames quantity > 1024
12/8/2015	1.2.1.28.1	<ol style="list-style-type: none"> 1. Minimum vertical scale: 2mV/div -> 1mV/div 2. Fixed several bugs <ul style="list-style-type: none"> a) Pass/fail has no output in some previous versions b) Freezing problem when Quick Cal is on c) Waveform update rate can drop when changing channel vertical setting d) Horizontal deviation between the cursor and the trace in zoom window when cursor is tracking mode e) Repaired Peak Detect problem in Roll mode f) Screen capture error in Roll mode

Date	Version	Revision
		g) Fixed French language spelling errors
		3. Updated the abbreviations of some measurement parameters
		4. In sequence mode, added a visible counter on the display to indicate how many segments have been acquired
9/8/2015	1.2.1.19	The first release supporting SDS2000X

Compatibility between Versions

Source Version	Object Version	Compatibility
1.2.2.2	1.2.2.2R10	Tested
1.2.2.1R9	1.2.2.2R10	Tested
1.2.1.38.7	1.2.2.2R10	Tested
1.2.1.33.1	1.2.2.2R10	Tested
1.2.1.28.1	1.2.2.2R10	Tested
1.2.1.19	1.2.2.2R10	Tested
