## Update Instructions

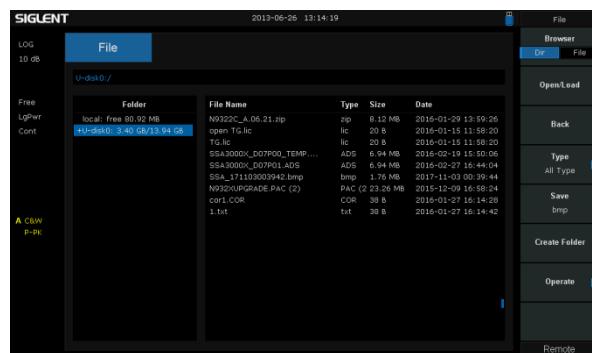

1. Copy the update file (\*.ads) to a FLASH type U-disk, and then connect the U-disk to the USB host port(10) of the instrument.

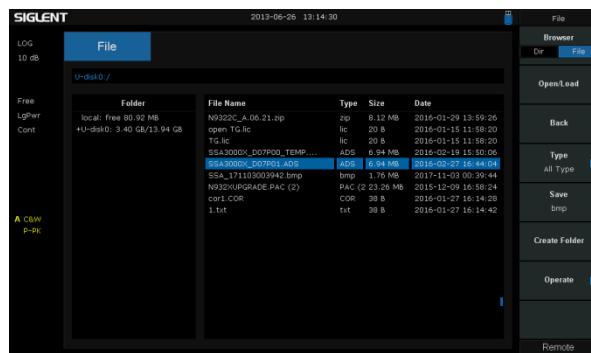

2. Press the **System** key on the front panel, and then softkey “System->System Info->Firmware Update”, to enter the interface of the file browser.

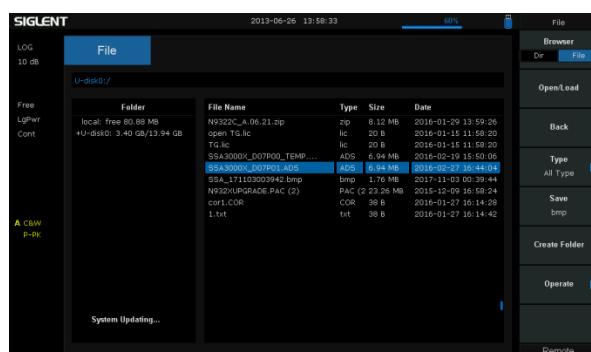

3. Select “U-disk” thru the knob on the front panel, press “Browser”, and then select the correct **ADS file** using the knob

4. Press “Open/Load” to start the update. A progress bar is displayed during the update.  
When updating complete, the spectrum analyzer will restart automatically.

## WARNING:

**DO NOT shut down the instrument during updating**
