

**Equip the new VNA Bundle and make Antenna Matching easy**  
**August 07, 2020**

**SIGLENT® Equip the VNA bundle and make antenna matching easy**

**VNA-Cal.Kit Bundle**

**Extra 5% OFF**

**Vector Network Analyzer + Calibration Kit**

All offers are valid until Jan 31st, 2021

(Except SVA1015X)

Antenna optimization is critical for wireless communications and control. For proper antenna measurements, instrumentation like vector network analyzers must be correctly calibrated. SIGLENT offers a number of calibration kits for use with the SVA1000X series spectrum & vector analyzer to meet stringent customer requirements.

We have just added 6 new VNA calibration kits and 2 new cables to our product line. To provide the best performance for varying conditions, we are now offering a VNA bundle. Just purchase one SIGLENT SVA1032X or SVA1075X analyzer, choose a VNA calibration kit and receive a 5% discount off the entire order. It's that easy!

We are also excited to announce that we have added the VNA as a standard function to the powerful SSA3000X-R Real Time analyzer series!

Now you can choose portable and powerful instrumentation with either standard or real-time spectrum analysis and VNA capabilities for an "all-in-one" RF troubleshooting experience.

Check it out, as this exciting offer will continue until January 31<sup>st</sup>, 2021.

SIGLENT TECHNOLOGIES reserves the right to all final decisions related to this campaign.
