SIGLENT SSA3000X-R/Plus Spectrum Analyzer Family Welcomes New Models & New Functions

August 07, 2020

With the addition of the SSA3032X-R model, Siglent's SSA3000X-R family of real-time spectrum analyzers now offers a frequency range of 9 kHz to 3.2/5.0/7.5 GHz! Like the SSA3050X-R and SSA3075X-R, released in April, the SSA3032X-R supports a real-time analysis bandwidth up to 40 MHz and 7.2 µs 100% POI. It's a powerful and flexible tool that solves modern RF spectrum challenges like hopping frequency, conflict channel, and spectrum interference.

Additionally, all of the SSA3000X-R series Real-time spectrum analyzers will feature VNA and DTF capabilities at no additional charge. The instruments will now have the ability to perform S11 and S21 measurements on RF components and circuits. The data can be graphed in a number of common formats, including Smith and polar charts.

Series	Model	Price
SSA3000X-R Real-time Spectrum Analyzers	**SSA3032X-R**	**€3,995**
	SSA3050X-R	€7,495
	SSA3075X-R	€9,115

Click here to get more information about the SSA3000X-R. https://www.siglenteu.com/spectrum-analyzers/ssa3000x-r/

SIGLENT also introduces the SSA3015X Plus spectrum analyzer with frequency range from 9 kHz up to 1.5 GHz. It offers excellent RF specifications, and features a 10.1-inch multi-touch screen, external mouse and keyboard operation. Equally important, its $1295 price enables engineers on a tight budget to benefit from the instrument's high performance.

Series	Model	Price

SSA3000X Plus Spectrum Analyzers	**SSA3015X Plus**	**€1,159**
	SSA3021X Plus	€1,469
	SSA3032X Plus	€2,439
	SSA3075X Plus	€6,509
