

SIGLENT Technologies Exhibits at ESC-Boston 2017

May 09, 2017

Siglent Technologies attended and exhibited at this year's ESC-Boston 2017 show in Boston, MA, held May 3 - May 4, 2017. Display booths from electronics and software vendors from around the world were located in the Exhibitors Hall.

Steve Barfield - General Manager, US Branch

SIGLENT showcased products including the SSA3000X spectrum analyzers, SDS2000X/SDS1000X-E digital oscilloscopes, SDG2000X arbitrary waveform generators, SDM3065X digital multimeters and the SPD3303X-E power supplies.

One of Siglent's newest models is the SDS1202X-E oscilloscope. The "X-E's" have kept the powerful features found in the SDS1000X-Series models, maintaining the series' simple and elegant appearance and interface design, use of SPO2.0 technology, and equipped with full-featured hardware digital trigger system. The SDS1000X-E also includes the same 1 GSa/s sample rate, a waveform capture rate up to 400,000 wfm/s, record length up to 14 Mpts, and supports a 256-level intensity grading and color temperature display. This level of performance is a true breakthrough at this price point.

Jason Chonko answers customer questions

We wish to thank everyone who came by our booth and we look forward to seeing you again next year!
