Correction factors in Monitor Mode with EasySpectrum software

December 18, 2018

SIGLENT EasySpectrum software includes the ability to create and edit correction factors that can be useful in correcting cable and adapter losses as well as adjusting spectral data for antenna gain.

To create a correction file:

- 1. Download EasySpectrum. Here is a link to the EasySpectrum Getting Started Guide
- 2. Connect your SIGLENT analyzer to the controlling computer
- 3. Open the EasySpectrum software
- 4. Right-click to select the spectrum analyzer from the list (USB connection) or enter the LAN address and choose Monitor M

5. Select the COR file icon:

EasySpectrum													
<u>F</u> ile <u>V</u> iew Instrume	ent <u>H</u> elp												
Devices and Interfaces	Monitor	#SSA3XJB4160)644										
。 家 SSA3032X "USB0::0xF	4EC::0	AMPT	BW	SWEEP	TRACE	MARKER	PEAK	TRIGGER	LIMIT	ТG	MEAS	PRESET	
Network Devices	LOG 10 dB Free LgPwr Cont	Ref 0.00) dBm		4tt 20.00 dB								Amplitude RefLev 0.00 Attenu 20.00 RefLei 0.00 Pre Correct

6. Enter the starting frequency (include the units) and the amplitude value of the first correction segment and press Add to enter the point into the table. Continue to add points to create your correction table. Press Svae and name the file as shown:

EasySpectrum		
<u>F</u> ile <u>V</u> iew Instrument <u>H</u> elp
