WiFi performance is slow or does not connect well to my network

November 19, 2019

Some high-performance routers with extended range like the Orbi RBR50 Mesh Network router do not work well with the SIGLENT TL_W725N wireless adapter.

The WiFi adapter update rate is also not as fast as a directly wired LAN connection.

A solution is to use an Ethernet to WiFi Wireless Adapter like the IOGEAR Ethernet-2-WiFi Universal Wireless Adapter, GWU637. These types of adapters offer more connection options at higher data rates.
